

MobiMoney

The perfect tool to manage your debit card.

MobiMoney is a mobile app that offers you a convenient way to manage your debit card. **MobiMoney** enables you to:

- Turn your card off or on.
- Limit usage based on location, merchant preferences, transaction type, and threshold amounts.
- Receive instant alerts on your mobile device.

To enroll you simply need to download the **MobiMoney** application from the Google Play Store or Apple App Store and have the following cardholder information ready to enter:

- Your 16 digit card number
- Your address
- The card security code
- The card expiration date
- The last 4 digits of your social security number

Next you will need to create your account:

- Select a User ID
- Select a password
- Select a passcode
- Enter your email address

Once you have registered and created your account you will be able to set controls and alerts to limit fraud:

Card ON/OFF:

Turn a card on or off with a single touch. See and change card status instantly.

Location Controls:

Specify card usage for an area or region of the map.

Merchant Type Controls:

Enable or disable merchant categories.

Transaction Type Controls:

Enable or disable specific transaction types.

Spend Limit Controls:

Set thresholds for transaction amounts.

Location Alerts:

Alert when cardholder location is different from merchant location.

Merchant Type Alerts:

Alerts delivered for specified merchant categories.

Transaction Type Alerts:

Alerts sent for specified transaction types.

Spend Limit Alerts:

Alert delivered when a transaction is above a specified amount, when amount exceeds a specified limit or when account balance falls below a specified amount.

Recent Transactions:

Allows for immediate detection and reporting of potential fraud.

Transactions:

See recent transactions

Manage Portfolio:

Add a card, hide a card, and select which accounts to show.

Settings:

Update personal information, change Passcode, and change Password.
